Tina. Did you read my last email? Their citation for MHI is not in that document. The document is very useful but does not cite MHI.

Jeff

Subject: MHI values

Jeff,

Could you please give me a sense of why you prefer to use the American Community Survey 5 - year 2011-2015 estimates vs. the MHI values that TT used? I just want to be able to convey the rationale for using those data to TT and make sure I understood the different sources. Thanks!

Tina
